COURSEWORK

GRADUATE
Distributed Systems
Advanced Databases
Program Analysis

UNDERGRADUATE
Operating Systems
Computer Networks

SKILLS

PROGRAMMING
Proficient:
Go • Rust • Python • SQL
Familiar:
Kotlin • Swift • Haskell

EXPERIENCE

HARBORVIEW SYSTEMS | SOFTWARE ENGINEER II
Jul 2021 - Present | Seattle, WA

- Own the rate limiter in front of the public API, which serves 40k requests per second at peak.
- Cut p99 latency of the billing service from 900 ms to 180 ms by batching ledger writes.

QUILLSTONE | SOFTWARE ENGINEERING INTERN
Jun 2020 – Sep 2020 | Portland, OR

- Built a search index for 2 million help-center articles with typo-tolerant queries.
- Wrote the load tests that the team still runs before every release.

LAKESIDE SYSTEMS LAB | RESEARCH ASSISTANT
Jan 2019 – May 2021 | Lakeside, WA
Worked with Prof. Ana Ortiz on a static checker for data races in Go programs; the tool found 14 confirmed races in open-source projects.

AWARDS

2020	1st/80	University Hackathon, Lakeside
2019	Finalist	Regional Programming Contest
