Experience

Tidewater Robotics, Head of Platform Engineering — Hamburg, Germany
Apr 2021 – present · 4 years 7 months

- Built the fleet telemetry platform that ingests 1.2 billion sensor readings a day from 3,000 warehouse robots, with 99.95% monthly availability
- Grew the platform team from 4 to 15 engineers across observability, deployment and data infrastructure
- Reduced cloud spend by 31% by moving cold telemetry to object storage with a query layer on top

Meridian Mobility, Senior Software Engineer — Berlin, Germany
Jan 2018 – Mar 2021 · 3 years 3 months

- Designed the trip-pricing service used in 11 cities
- Led the migration of the dispatch system to an event log
  - Moved 60 consumers with no downtime
  - Wrote the replay tooling used for incident analysis

Kestrel Labs, Software Engineer — Bremen, Germany
Sep 2015 – Dec 2017 · 2 years 4 months

- Implemented the offline sync engine of the field-service app, used by 8,000 technicians, with conflict resolution for concurrent edits made without network

Education

BSc Hamburg University of Technology, Computer Science — Hamburg, Germany
Oct 2011 – Jul 2015

- Thesis: Scheduling heuristics for multi-robot pick routes

Projects

tracewire — Jan 2022 – present

Library that adds structured tracing to embedded devices, published as open source

- Adopted by 2 robotics vendors, 1,900 GitHub stars

Skills

Languages: Go, Rust, Python, C++
Infrastructure: Kubernetes, Terraform, Kafka, ClickHouse, Prometheus
