Summary

Backend engineer with nine years of experience building payment and logistics services in Node.js and Go. I like owning a service end to end, from the database schema to the on-call rotation.

Experience

Senior Backend Engineer, Parcelly (Lviv), March 2021 – present

- Designed the delivery-tracking API in Node.js and PostgreSQL that serves 40 million requests a day.
- Cut the p95 latency of route quotes from 900 ms to 180 ms by moving pricing rules into a cached Go service.
- Led the migration from a monolith to six services over 14 months without downtime.
- Mentored three junior engineers and ran the backend interview loop.

Backend Engineer, Paymint (Kyiv), June 2018 – February 2021

- Built the card-payment reconciliation job in Node.js that matches 2 million transactions a night.
- Added idempotency keys to the payments API, which removed duplicate charges reported by support.
- Wrote the integration tests for the PSP adapters and set up their CI pipeline in GitHub Actions.

Junior Developer, Kameniar Soft (Lviv), July 2017 – May 2018

- Maintained REST endpoints of a hotel booking system in Java and Spring.
- Fixed production bugs found by the QA team and wrote regression tests for them.

Education

Lviv Institute of Applied Mathematics, BSc in Applied Mathematics, 2013 – 2017

Skills

Node.js, TypeScript, Go, PostgreSQL, Redis, Kafka, Docker, Kubernetes, AWS, GitHub Actions

Languages

English (C1), Ukrainian (native), Polish (B1)
