SUMMARY

Backend engineer with seven years of Java and Kotlin work on payment and ledger services. I like turning slow batch jobs into small services that are easy to operate.

EXPERIENCE

2022 – present
Tallowgate Systems
Odesa

Senior Backend Engineer

- Split the nightly ledger batch into three Kotlin services; month-end close went from two days to five hours.
- Introduced contract tests between the ledger and the invoicing team.

2020 – 2022
Tallowgate Systems
Odesa

Backend Engineer

- Moved card refunds from a cron script to a queue consumer with retries.

2018 – 2020
Ironbark Labs
Remote

Junior Java Developer

- Maintained the reporting module of a logistics platform (Java 8, Spring, MySQL).
- Wrote the first integration tests for the order export.

2017 – 2018
Quayside Games
Odesa

QA Intern

- Tested release builds of two mobile games and filed crash reports.

EDUCATION

2014 – 2018
Odesa Polytechnic University

BSc Software Engineering

SKILLS

Kotlin, Java, Spring Boot, PostgreSQL, MySQL, RabbitMQ, Docker, contract testing

LANGUAGES

Ukrainian (native), English (C1), Polish (B1)
